

Adnaan M's Bio as Founder of ToSpace

Adnaan M is the founder of ToSpace, a leading company in satellite launch services, especially for Pocketcube satellites. He graduated with a degree in Physics from Government Arts College in Karur and has risen from a humble background to make significant contributions to the space industry.

In 2022, Adnaan led ToSpace through a year focused on research and development. This hard work paid off in early 2023 when ToSpace secured its first government contract through the Startup TN's S2G program. This contract, worth 18 lakh rupees, helped 183 students expand their knowledge and opened up new opportunities for the company, including a partnership with ITNT at Anna University.

Adnaan's leadership has made ToSpace the only company in India specializing in pocketcube satellite launches, helping satellite developers work smoothly with rocket companies. ToSpace also offers unique High-Altitude Balloon (HAB) launch services for space advertising and affordable research.

Thanks to the visibility gained from Startup TN, ToSpace has achieved impressive milestones, such as selling over 5000 satellite course kits to private companies. The company has also secured contracts for five new course kits and commitments from private organizations for the upcoming year.

Under Adnaan's guidance, ToSpace has received several awards, including recognition from IMC 2023 and the Half Brick Community for being an innovative early-stage startup in 2023.

Adnaan M's journey from a modest background to a key figure in space exploration highlights his dedication, expertise, and visionary leadership. His work at ToSpace continues to inspire and enable many to participate in the growing space industry.
